International Express and Global Logistics Specialists.

OUR STORY

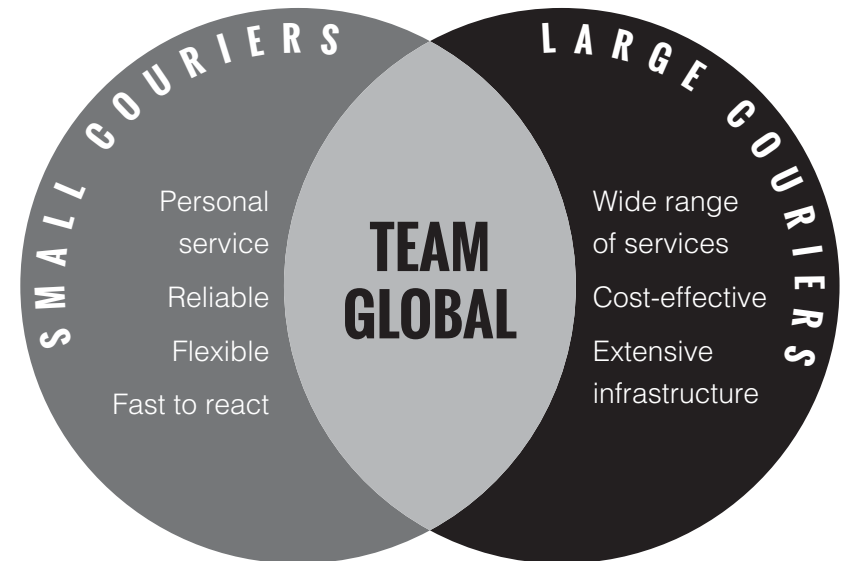

Delivering time critical express & logistics solutions since 1987

Team Global provides time critical express & logistics solutions for companies and organisations that require a high level of service, coupled with being flexible and proactive.

Team Global is strategically located five minutes from London Heathrow Airport which provides exceptional responsiveness for time critical express and air freight consignments.

Team Global recognise that small courier companies offer a personal service but lack the experience and breadth of services now required by modern business. The larger carriers have the service capability but can be slow and cumbersome to deal with.

Team Global bridges that gap, now in our 29th year and still run by the same management team, we have moved with the times and now work with all major carriers, plus our real niche, our own express and air freight service that fit nicely within our product portfolio.

EXPRESS SERVICES

Whether you require next day, same day or a time definite delivery, Team Global will tick all your boxes.

Team Global offers world class express, domestic and time critical services that are tailored to individual needs.

Throughout our 29 years of providing leading delivery services, we have preserved our traditional values and continue to build and maintain trusted relationships with our clients.

Our customer services team monitors each and every consignment entrusted to us and when successfully delivered, a signatory name, date and time will be sent directly to your designated email address.

Express

A flexible, proactive international courier service for transporting your shipments via the quickest means possible to any address in the world.

Operating our own direct routes coupled with our purchasing power with a range of carriers, enables Team Global to provide fast, secure and cost effective express delivery solutions, whatever the destination or time constraints. You get direct access to our experienced export team, who sort out all the paperwork and make sure your delivery reaches your customer without any hassle.

STORAGE SOLUTIONS

A man in a grey jacket and dark pants is walking down a long aisle in a warehouse. He is pushing a red pallet jack loaded with several cardboard boxes. The aisle is flanked by high industrial shelving units (pallet racks) filled with boxes and other supplies. The lighting is bright and even, highlighting the organized nature of the storage space.

We manage single stock call-offs, through to complex multiple distributions.

We provide controlled, clean, secure storage which is ideal for global logistics, exhibitions, business trade shows and international events.

All goods are verified, photographed, barcoded and logged electronically so you always have access to inventories, stock reports, and shipment services online.

Our warehousing facility is located near London Heathrow and has 24 hour security, CCTV and access control restrictions.

Our online storage portal (WMS) allows you to keep track of your company's stock, so you will know when you need to re-order. The portal offers you multiple pick options for each product, and once completed, your order is immediately processed, packed and exported by our warehouse team.

If your goods require guaranteed delivery date and time we will offer full advice and support on the best logistics solution for your shipment. Our ExpoTeam, who specialise in events, will continue to follow the shipment until delivery has been completed and POD has been obtained.

Team Global have had amazing feedback from event managers about this bolt on service.
